

## Carrabassett Valley Trails Committee

**Date:** 1Jun2023

**To:** CVTC Committee Members

**From:** CVTrails Pump Track Sub-Committee:  
Adam Craig, Deb Bowker, Ed Gervais

**Subject:** Status Update

The CVTC tasked an ad-hoc subcommittee with an initial review of options for potential relocation of the pump track. The current location may not be ideal in the long run due to space constraints and potential development plans for this town-owned property.

The subcommittee, with input from other community members, has compiled a first-pass list of potential alternate sites to support CVTC discussion.

1. Outdoor Center at adjacent to the rink
2. Outdoor Center at junction of access road and parking lot
3. Outdoor Center along secondary through way, adjacent to Snail Trail
4. Outdoor Center near Par 3
5. Outdoor Center adjacent to lower parking lot
6. Adjacent to the Stratton Brook Trailhead parking lot
7. Near Campbell Field parking lot between the Old Gauge trail and the Narrow-Gauge multi-use path

Each location offers advantages and poses challenges including such characteristics as:

- Proximity to parking
- Spectator/parent visibility
- Safety
- Site prep
- On-site materials
- Permissions

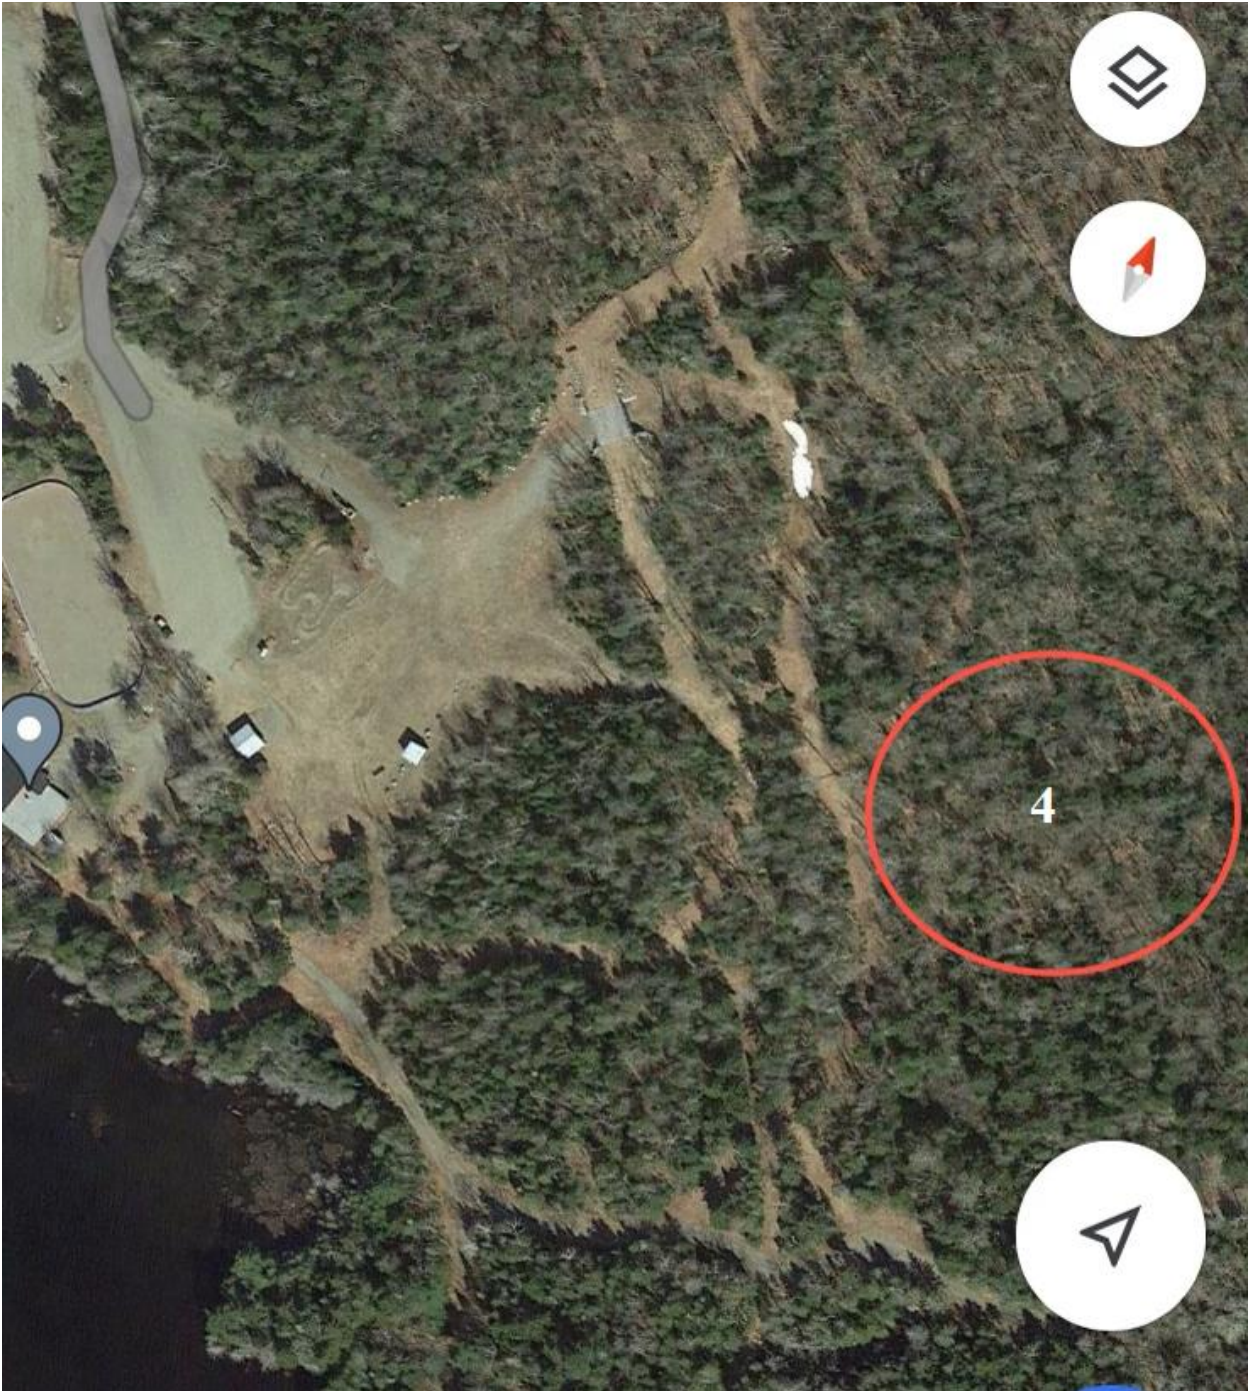

In the interest of promoting as much community input as possible, the Subcommittee has refrained from any specific analysis in this update and rather looks forward to some good discussion.

Options 1, 2, and 3 at the Outdoor Center

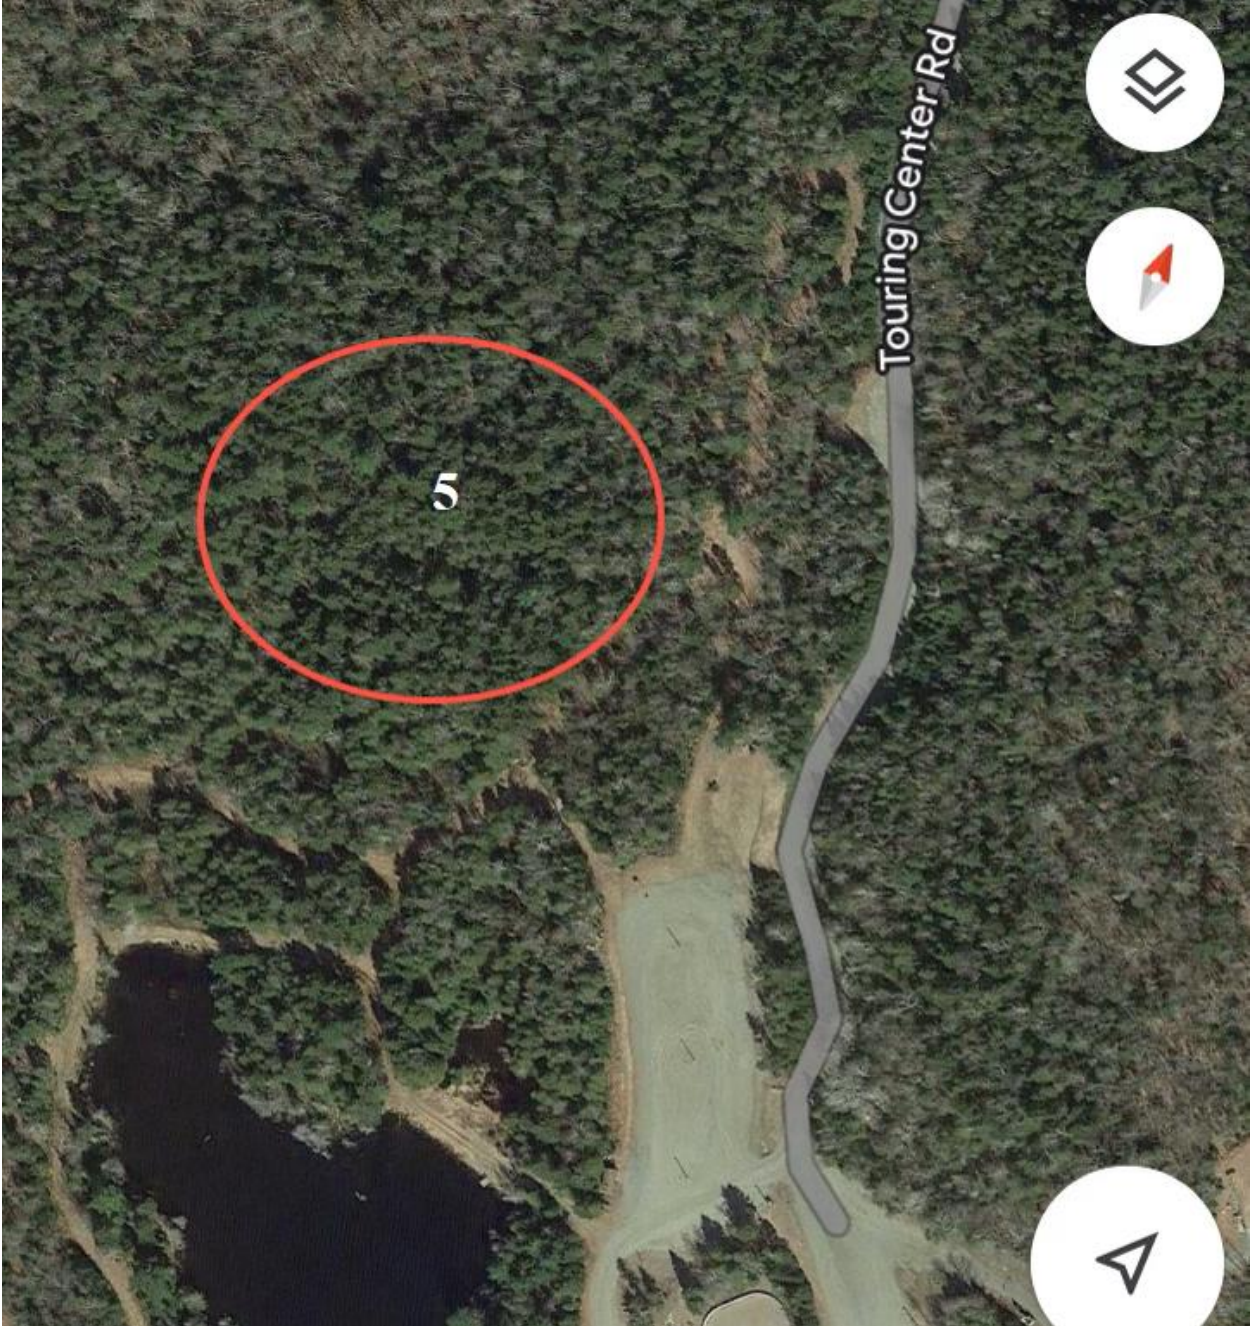

Option 4 at the Outdoor Center

Option 5 at the Outdoor Center

Option 6 Adjacent to Stratton Brook Trailhead Parking Lot
